

Specialist cardiac diagnostic services you can trust

In response to a vast number of outpatient departments operating at significantly reduced capacities across the NHS, our specialist cardiac diagnostics team are working in close partnerships with NHS Trusts and CCGs to deliver high quality, flexible managed services. Xyla Diagnostics is a leading specialist in the provision of echocardiography and cardiac rhythm analysis services, with every aspect of our pioneering clinical support service designed to increase capacity, efficiency and quality across the cardiac diagnostics industry.

Our goal is to be your specialist, dedicated partner, providing experienced diagnostic clinical staff seven days a week, out-of-hours and on-demand, giving you the reassurance that when you need us, we'll be there.

We offer:

- Specialist diagnostic echocardiography and cardiac analysis services,
- A dedicated team of experts supporting you
- Flexible capacity as your demands and resources change
- Tailored services to meet your unique requirements, systems and workforce
- Onsite and remote diagnostic service available
- Monthly and quarterly reporting on service performance
- Robust audit and clinical governance procedures to underpin the entire process

We offer three diagnostic services:

Our CQC managed services seamlessly integrate into local systems, policies and processes at both primary care or secondary care level. Whether supporting an outpatient department in an acute hospital; working at a regional community hospital or health centre; or through providing remote analysis or audit support, we provide the following services:

Acute echocardiography services

Inhouse outpatient, inpatient and advanced echo capacity. Short, medium and long-term echocardiogram capacities agreed to allow for fluctuating demand. Equipment may be provided upon request.

Community echocardiography services

Outsourced managed echocardiography services to support CCGs and community health centres. From the point of patient referral to your receipt of completed patient report, we'll manage the entire pathway.

ECG, Holter and BP analysis

We remotely analyse your 12-lead ECGs, Ambulatory Holter Monitors, and BP Monitors, to provide you with secure specialist diagnostic services that you need. We can either integrate with your existing systems, or provide equipment and systems to support the whole service.

Benefits of working with Xyla Diagnostics:

- Partnership with CQC-registered specialists in the cardiac diagnostics field
- Tailored services, pathways and models of care
- Seamless integration into local systems and processes
- Increased clinical capacity resulting in the ability to consistently meet RTT targets
- Secure yet flexible clinical capacity to meet demand fluctuations
- Same-day turnaround of Echo, ECG and ABPM results
- Consultant-led analysis services, with access to expert diagnostic and medical leads
- Robust quality management framework
- Reduction or elimination of report/analysis backlogs
